LEG

PANEL END LEG
WOOD / ALUMINIUM FINISH

The Didra leg consists of 2 melamine panels, thickness 22 mm and 25 mm.

The inner panel (22 mm) has an aluminium finish and flat aluminium finish edging.

The outer panel (25 mm) has a wood finish, post-formed vertically on the sides.

If you choose a desk with return configuration, one leg is offset in the corner for maximum comfort.

It is equipped with height adjustable screw jacks allowing adjustment of up to 10 mm.

TOP

STRAIGHT

STRUCTUREX®

The Didra top consists of a 25 mm thick **Structurex®** panel. The user side has post-formed edging. The other 3 sides are protected by 2 mm thick, chlorine-free, shock-proof ABS edging.

The leg gives the top an offset design. **Structurex®** panels are manufactured on a fully automated production line. They are PEFC labelled counter-balanced melamine panels with anti-reflection treatment, density 680 kg/m³, ±5 %, complying with the requirements of the Centre Technique du Bois et de l'Ameublement (CTBA).

The return is available in **Structurex®** version or glass version, both versions being equipped with a rectangular cable port.

MODESTY PANEL

The DIDRA modesty panel is made of 25 mm **Structurex®** panel assorted to the tops. It is postformed at the bottom and finished with 3 silver strips.
