LEXUS is a chairman program made of wooden agglomerate covered with precious wooden essence, in walnut, wengè and oak.

All veneered surfaces are handled by extremely new paints specific for wood and have mat finishing with the pore half-closed. The painting has the purpose to emphasize and preserve the wooden parts which need a particular care and attention. Besides, the wood, being a natural material, could show chromatic differences between a part and the other, especially when the vein way is opposing.

CHAIRMAN DESKS AND CONFERENCE TABLES:

The tops with shaped forms are realized by a selected agglomerate of light wooden particles of 1,96" thickness with elevated mechanical characteristics. The upper part is covered in shorn of 0,02" thickness, while the lower part is counter plated by an appropriate material, the declared final thickness is of 2,00. The perimetrical edges are in wood too, with the same finishing as the top, but with a 0,07" thickness and rounded corners.

The frame, in the wooden version is made up of sides realized by the same materials as the top and by a shaped beam covered in shorn too, but of 19 mms thickness. The top is fixed to the sides through pressure-die cast aluminium stirrups silver coloured only on the desks. They allow a better cables passing from the top to the lower part, as well as the aesthetic feature. All the sides have levelling feet in plastic material of a minimal height of 0,47 and maximal height of 0,98".

The metallic legs are characterized by a capital with a crown shape realized in pressure-die cast aluminium and painted in silver colour, while the frame of the square section of 3,54"x3,54" is proposed in different versions: 1) in extrusion of silver anodized aluminium. 2) in metal with the application of mdf frames covered in wooden essence in the same finishings as the top. 3) still in metal with the application of mdf frames covered in leather in the black, beige and dark brown colours with vertical stitchings of different colours. Plastic levelling feet are placed at the base of the legs to allow the levelling of the table.

DESK and SERVICE TABLE in the GLASS version.

They are available only in the version with metallic frames. The oval tops are realized in semitransparent white satinized temperate glass of 0,59" thickness with perimetrical flat sides and round edges. Some steel plates are placed in the lower part to allow the fixing of the legs.

EXECUTIVE DESKS and CONFERENCE TABLES.

The available tops in the rectangular or moulded shapes are realized in wooden agglomerate of 1,49" thickness. The upper part is covered in shorn of 0,02" thickness, while the lower part is counter plated by an appropriate material, the declared final thickness is of 1,57". The edges and the finishings are the same as the chairman version.

The frame in the wooden version is made up of sides realized by the same materials as the top and by a shaped beam covered in shorn too, but of 0,74" thickness. The desks are available both with the sides spaced out by the top and fixed through pressure-die-cast stirrups and in silver colour, and with the top which leans directly on the sides.

The metallic legs, instead, are the same as the chairman ones with the addition of simple feet, without crown and cheaper (available only in anodized aluminium silver colour).

SERVICE UNIT:

It is realized with the same finishings as the desks, it is equipped with a central balancing door and openings which allow the passing of the cables from the floor to the upper part of the back (under the top), while the pedestal is inserted in the side spaces, indifferently on the right or on the left.

There is also the version with the fridge, that is codified apart, because it is necessary a further working to the unit frame for the cooling of the fridge itself. The wheels or the feet, depending on the exigences, have to be added.

PEDESTAL:

It is available with 4 drawers (three + one stationary drawer) or with three drawers with filing drawer plus a standard and one stationary drawer, are realized with the same finishings as the desks, with the frame and the front items of 0,74" thickness (external in shorn and internal counter plated in silver colour). The perimetrical edges are still in wood of 0,59"/0,39" thickness and the inside part of the drawers sliding on metallic guides with nylon rollers, are in sheet steel printed and painted with eposidic powders; while the inside of the stationary drawer is in plastic thermo-shaped material.

CORONA IN ALLUMINIO PRESSOFUSO

- ALUMINUM PRESSURE DIE CASTED CAPITAL
- CORONA EN ALUMINIO PRESOFUNDIDO
- COURONNE EN ALUMINUM MOULE SOUS PRESSION

FIANCO LEGNO CON STAFFA IN ALLUMINIO PRESSOFUSO

- WOODEN SIDE WITH ALUMINUM PRESSURE DIE CASTED STIRRUP
- LATERALES MADERA CON ESTRIBO (ENGANCHE) EN ALUMINIO PRESOFUNDIDO
- CO TE BOIS AVEC ETRIER EN ALUMINUM MOULE SOUS PRESSION

PIEDE METALLICO NELLE VERSIONI:

- 1) ALLUMINIO
 - 2) RIVESTITO LEGNO
 - 3) RIVESTITO CUOIO
- METALLIC FOOT IN THE VERSIONS:
 - 1) ALUMINUM
 - 2) WOODEN COVERED
 - 3) LEATHER COVERED
 - PATA METALICA EN VERSION:
 - 1) ALUMINO
 - 2) RIVESTIMIENTO MADERA
 - 3) RIVESTIMIENTO CUERO
 - PIED METALLIQUE DANS LES VERSIONS:
 - 1) ALUMINUM
 - 2) REVETU BOIS
 - 3) REVETU CUIR
