Technical characteristics

Kompas

KOMPAS is a system designed to organise the office with multiple solutions: traditional, ergonomic and corner tops on metal and various design bases with full sides. The desk sides, the table tops, the cabinet tops and the drawer unit tops are constructed in 1,18" thick wood agglomerate, covered with melamine resin in a wax finish in grey, walnut and beech. The edges of the tops are finished with a colour matched corrugated border, 1,18" thick, with rounded corners as required by accident prevention regulations. All of the drawer units come with a stationery drawer and centralised locking system with simultaneous closure with the exception of the hanging file drawer. Desk height metal drawer units are also available. The containers - available in 2 widths, 17,71" and 35,43", and in 4 heights, 34,05", 50,00", 66,92" and 82,87" - are all modular. Their frames are constructed in 0,70" thick wood agglomerate, while the tops and intermediate shelves are 1,18" thick. The finishing back panel which is applied to the back of each module is a convenient accessory for using the cabinets in the centre of the room. All of the articles, with the exception of the drawer units, the document tray and the file cabinets are supplied knocked down and packed in triple cardboard with edging protection; they come complete with quick coupling metal hardware.

KOMPAS is also available with various metal support structures, either stationary or height adjustable, canalised and suited to all operational models; the structures are constructed in moulded steel sheet metal and painted with an epoxy powder finish in anthracite or aluminium colour. The body of the leg can be entirely constructed in painted sheet metal or supplied with an anthracite coloured plastic cover. The cross beams which connect the legs - supplied exclusively in anthracite colour - are available in either stationary or telescopic versions. The frame, supplied totally knocked down, is easily assembled thanks to the use of the hardware included and a bayonet coupling system.

I piani sono realizzati in agglomerato ligneo dello spessore di cm 3 nobilitato con resine melaminiche in finitura cera nei colori grigio, noce e faggio. Tutto il perimetro del piano è rifinito con bordo multirighe in tinta dello spessore di cm 0,3 con spigoli arrotondati r.0,3 cm .

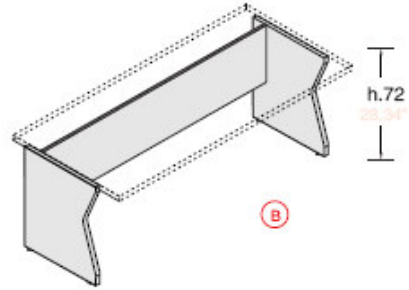

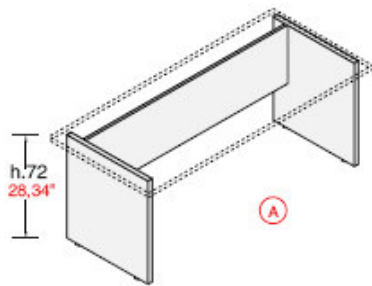

The working tops are made of wooden agglomerate of 1,18" and finished melamine faced in grey, walnut or beech. The perimeter of the tops is finished off by a 0,11" thick multiline edge of the same colour of the top with rounded edges r.0,11".
